<b>(54) Title:</b> NUCLEIC ACID MEDIATED ELECTRON TRANSFER		
<b>(57) Abstract</b>  <p>The present invention provides for the selective covalent modification of nucleic acids with redox active moieties such as transition metal complexes. Electron donor and electron acceptor moieties are covalently bound to the ribose-phosphate backbone of a nucleic acid at predetermined positions. The resulting complexes represent a series of new derivatives that are bimolecular templates capable of transferring electrons over very large distances at extremely fast rates. These complexes possess unique structural features which enable the use of an entirely new class of bioconductors and photoactive probes.</p>

## INTERNATIONAL SEARCH REPORT

Internat Application No

PCT/US 94/13893

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 6 C07H21/00 G01N33/50 C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 6 C07H G01N C12Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	WO,A,93 10267 (IGEN INC) 27 May 1993 see the whole document ---	19,20
X	DATABASE WPI Derwent Publications Ltd., London, GB; AN 88-320199 & JP,A,63 238 166 (MITSUBISHI DENKI KK) , 4 October 1988 see abstract ---	1
X,Y	SCIENCE, vol. 262, 1993 pages 1025-9, C. J. MURPHY ET AL. 'Long-Range Photoinduced Electron Transfer Through a DNA Helix' see the whole document --- -/--	5-8,19, 20

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

## \* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&amp;" document member of the same patent family

Date of the actual completion of the international search

5 July 1995

Date of mailing of the international search report

- 7. 07. 95

Name and mailing address of the ISA

European Patent Office, P.B. 5818 Patentlaan 2
